Recommended: YES

Program Title	Top Code	College	Contact
1. Applied Human-AI Collaboration & Leadership Bachelor of Science	0501.00	Fullerton College	Gary Graves ggraves@fullcoll.edu

The region discussed the proposed Applied Human-AI Collaboration & Leadership Bachelor of Science, with the discussion generally supportive and focused on the program’s purpose, differentiation, and workforce relevance. It was clarified that the program is designed to prepare graduates to lead and manage AI implementation within organizations rather than train AI engineers. The interdisciplinary curriculum integrates applied AI, leadership, organizational change, ethics, business strategy, and human-AI collaboration.

The region also discussed workforce demand and career pathways, noting the growing need for professionals who can bridge AI capabilities with organizational leadership across multiple industries. The program was described as complementing, rather than duplicating, existing computer science and technical AI programs and as aligning with California Community Colleges’ efforts to address emerging workforce needs.
