New Program

Substantial Change

Locally Approved

Program Information

1221 Recommended [Taxonomy of Program \(TOP\) Code](#)

_____ Units for Major-Degree

_____ Total Units for Degree

28.25 Required Units-Certificate

Written Form

1. Insert the description of the program as it will appear in the catalog. (See PCAH pp. 142 and 170)

This program is designed to prepare students for a career in pharmacy. Upon successful completion of the required coursework students are eligible to apply for the State of California Pharmacy Technician licensure and are prepared to work in outpatient (Basic Certificate), inpatient (Advanced Certificate), and home health care pharmacy settings (Basic and Advanced Certificates). The curriculum is not aligned to transfer to a specific major at a four-year college or university (Associate Degree).

2. Provide a brief rationale for the program.

The health care industry is one of the most rapidly growing industries in the United States. This rapid growth has created many employment opportunities in the health field. Consequently, there is a need to introduce students to the broad range of job opportunities in the health occupations.

The certificate program will introduce students to a broad range of skills and knowledge which the healthcare employers are seeking. Student will be expected to know the following:

- Basic knowledge and skills in pharmacy techniques
- Basic communication skills including phone and face-to-face
- Basic knowledge of inpatient and outpatient pharmacy services
- The guide lines for HIPAA

3. Summarize the Labor Market Information (LMI) and employment outlook (including citation for the source of the data) for students exiting the program. (See PCAH pp. 85-88, 136, 147, 148, 165, 168, and 176)

According to EMSI, for LA and Orange counties, the occupation of Pharmacy Technician (PT) will increase by 24% from 2013-2023. The educational attainment for PT shows 80% of jobs require an Associate Degree or less, and the median wage is \$18.22. All of the above attests that PT is a high wage, high demand, and high skill occupation and one in which the California Community Colleges are uniquely qualified to train for. In addition, the Posting Intensity of 7:1 indicates that companies try harder to hire PT than other occupations. Finally, with Annual Openings of 437 and only 64 completions by community college students, there is a gap that LA Mission College aims to address. Pharmacy Technician is one of the top 10 growing occupations in Los Angeles County (2010 – 2020 Fastest Growing Occupations, Employment Development Department, Sept. 2012)

Sample of Reported Job Titles: Pharmacy Technician (Pharmacy Tech), Certified Pharmacy Technician (CPhT), Technician, Inventory Specialist, Technician, Senior Pharmacy Technician, Lead Pharmacy Technician (Lead Pharmacy Tech), Lead Pharmacy Tech, Certified Pharmacy Technician (Lead Pharmacy Tech, CPhT), Compounding Technician, Billing and Quality Technician, Accredited Pharmacy Technician
 Related O*NET Occupation: Pharmacy Technicians (29-2052.0)

4. List similar programs at other colleges in the Los Angeles and Orange County Region which may be adversely impacted. (There is space for 10 listings, if you need more, please contact laocrc@sccollege.edu)
